

Yogita Patil

Web Developer

About Me

- Web Developer engineer with 2 years of IT experience.
- Proficient in HTML, CSS, JavaScript and J2EE, committed to delivering scalable and high-performance web applications.

PROJECT EXPERIENCE

Healthcare Website

Role: Web Developer

Client: Healthcare Company in US

Played a key role in developing a healthcare website which provides essential services and resources to users in the United States. The website makes it simple for users to find doctors and other healthcare resources in their area.

Roles and Responsibilities:

- Developed and implemented the front-end interface using HTML, CSS, and JavaScript to create user-friendly website.
- Ensured a seamless user experience across various devices and screen sizes through responsive design practices.
- Collaborated with UI/UX designers to transform mock-ups and wireframes into functional and visually appealing web pages.
- Conducted regular code reviews to maintain code quality and consistency.
- Contributed to the back-end development using Java and Spring Boot to handle data processing and server-side operations.
- Collaborated with the back-end team to design and implement Restful APIs, enabling smooth communication with the front-end.
- Collaborated with the team to implement a powerful search feature, allowing users to find healthcare providers based on various search criteria (e.g., location, Agency Name).
- Supported the team in conducting security audits and vulnerability assessments to maintain website security.
- Assisted in conducting regular maintenance tasks, including updates to keep the website running smoothly.
- Supported the team in seamless integration of new features and updates.
